

It has come to our attention that products by Carlisle Construction Materials (CCM) have been specified in the following Sections of the aforementioned Project Specification:

The products specified in the above Sections are designed to provide thermal and/or moisture protection for the building envelope. Continuity of air- and water-resistive barrier materials is essential for effective building envelope performance. Tie-ins of dissimilar products are often neglected or incorrectly executed. Missing or poor tie-ins are a common source of air and water leakage.

This Project is eligible for CCM's NVELOP program. NVELOP consists of materials and installation for warranted tie-ins of dissimilar CCM thermal and moisture protection products. Tie-ins are made with a physical overlap of CCM flashing or membrane to form an air- and water-tight connection of one CCM product to a neighboring CCM product.

CCM's NVELOP warranty provides for replacement of CCM materials in tie-ins which have exhibited air or water leakage as a result of product manufacturing defects or as a result of chemical incompatibility of neighboring CCM products. Please consult the attached sample warranty for more information. Available warranties:

- NVELOP 5-year material warranty. No fee.
- NVELOP-PLUS 10-year or 15-year material warranty. The shortest-warranted CCM product of the tie-ins shall be greater than or equal to the duration of the NVELOP-PLUS warranty. \$500 fee.

These are the requirements for CCM to issue an NVELOP or NVELOP PLUS warranty for this Project:

- Install CCM products for Work in the above Sections.
- Installed CCM products are eligible for warranty, or product warranties have already been awarded.
- Perform tie-ins of neighboring CCM products according to NVELOP details (applicable details attached).
- Complete the simple, one-page NVELOP or NVELOP PLUS Warranty Application form (attached).

Thank you for using CCM products on your project. Please contact us with any questions or concerns.

Sincerely,
